==========

Rx MEDICATIONS

==========

1. Tab. ASPIRIN 150 mg

   Dosage: 1 tablet ONCE daily (after breakfast)

   Duration: LIFELONG

   Note: Never stop without consulting doctor

2. Tab. CLOPIDOGREL (Plavix) 75 mg

   Dosage: 1 tablet ONCE daily (after breakfast)

   Duration: AT LEAST 12 MONTHS

   Note: Do not skip doses. Very important for stent.

3. Tab. ATORVASTATIN (Atorva) 80 mg

   Dosage: 1 tablet ONCE daily (at bedtime)

   Duration: LIFELONG

   Note: For cholesterol control

4. Tab. METOPROLOL 25 mg

   Dosage: 1 tablet TWICE daily (morning & evening)

   Duration: Continue

   Note: For heart rate and BP control

5. Tab. RAMIPRIL 5 mg

   Dosage: 1 tablet ONCE daily (morning)

Duration: Continue

Note: For BP control and heart protection

6. Tab. METFORMIN 500 mg

Dosage: 1 tablet TWICE daily (with lunch & dinner)

Duration: Continue

Note: For diabetes control

7. Tab. PANTOPRAZOLE 40 mg

Dosage: 1 tablet ONCE daily (empty stomach, before breakfast)

Duration: 30 days

Note: To protect stomach from other medicines

8. Tab. ECOSPRIN AV-150 (Fixed Dose Combination)

Alternative: May use instead of separate Aspirin + Clopidogrel

Dosage: 1 tablet ONCE daily (after breakfast)

==========
